Education

Master of Science in Human-Computer Interaction, Indiana University, Indianapolis

Aug 2021 - May 2023

Bachelor of Engineering in Computer Engineering, University of Mumbai

Jul 2016 - Aug 2020

Work Experience

hc1.com, Remote – *Senior Product Designer*

May 2022 - May 2026

AI-Native Product Design

- Designed Anemia Management, an AI clinical decision support tool deployed across 20+ health systems, defining LLM-style reasoning surfaces and physician-ready outcome reports that cut alert-to-care-plan time to under 2 minutes and reduced transfusions by 40%.
- Owned end-to-end UX for an AI-powered lab supply chain platform, designing flows and production-ready screens for two AI agents detecting cross-facility pricing gaps and GPO compliance violations across a \$25–30M portfolio, projected to surface up to \$850K in per-vendor savings and cut manual analysis by over 70%.
- Spearheaded UX for Workforce Optimization, a 0-to-1 predictive lab staffing platform, from customer discovery through interactive prototypes to launch, achieving 18% labor cost reduction and 34% efficiency gain within 6 months.

End to End Design & Analytics

- Rebuilt a high-density clinical configuration platform through 8 stakeholder interviews and 6 usability tests, restructuring IA around clinical mental models to cut configuration time by 60% and triple active users.
- Consolidated 2 legacy tools into Data Control Center, a guided self-serve data platform, through a build-vs-buy evaluation, reducing customer activation time by 48% and enabling 2x faster data onboarding.

Design Systems and Standards

- Built the company's first design system on Shadcn serving 4 product lines, with design tokens, Figma libraries, and Storybook documentation, improving team velocity by 25% and shortening release cycles by 20%.
- Created a comprehensive style guide for the Analytics Platform built in Looker, unifying 10+ data-heavy dashboards under a consistent visual language.

Indiana University, Indianapolis – *UX Research Assistant*

Sep 2021 - May 2023

- Directed NSF-funded mixed-method user research under Dr. Erin Brady, designing and executing studies with 20+ disabled professionals to identify systemic workplace accessibility barriers and develop evidence-based inclusive design frameworks.
- Synthesized findings across cognitive, physical, and social accessibility dimensions into actionable design recommendations, presenting to academic and industry stakeholders to inform accessible enterprise product standards.

GraffersID, Remote – *UX Designer*

Jun 2020 - Jun 2021

- Delivered end-to-end UX/UI across 15+ enterprise and startup client engagements in agile environments, making trade-off decisions that cut project timelines by 25% and saved 4 weeks of dev overhead per engagement.
- Overhauled the company website conversion architecture through user flow analysis and competitive research, increasing engagement by 35% and client conversions by 18%.

Skills

- **Design:** Interaction Design, Visual Design, Information Architecture, Responsive Design, Micro-interactions, Design Systems (MUI, Shadcn), Design Tokens, Accessibility (WCAG)
- **Strategy & Research:** Product Strategy, UX Strategy, Product Roadmapping, Experimentation Frameworks, Customer Discovery, Usability Testing, Content Strategy, Stakeholder Management, Agile
- **Code:** HTML, CSS, JavaScript, React, TailwindCSS, SQL, GitHub, VSCode
- **AI:** AI/ML Interaction Patterns, LLM-Powered Interfaces, Agentic UX, AI-Assisted Prototyping
- **Tools:** Figma, FigJam, Antigravity, Google Stitch, Claude, Cursor, Figma Make, Bolt, Lovable, Miro, Jira, Confluence, Looker

Leadership

- Pioneered an AI-assisted prototyping pipeline (Bolt, Claude Code, Cursor) that translated design intent directly into production-ready React components, cutting design-to-development handoff time by 50% across the product team.
- Established the team's design documentation standards and critique process from scratch, giving engineering and product clear visibility into design decisions and reducing spec-driven back-and-forth during sprints.
- Facilitated a hands-on product design workshop at Stevens Institute of Technology, guiding students through end-to-end product development across user research, design systems, and product analytics.
