

Education

Master of Science in Human-Computer Interaction, Indiana University, Indianapolis
Bachelor of Engineering in Computer Engineering, University of Mumbai

Aug 2021 - May 2023 | GPA: 3.85
Jul 2016 - Aug 2020

Work Experience

hc1IQ, Remote – *Senior Product Designer (Founding)*

May 2022 - May 2026

AI-Native Product Design

- Designed Anemia Management, an Epic-embedded AI clinical decision support tool, defining LLM-style reasoning surfaces and physician-ready outcome reports that cut alert-to-care-plan time to under 2 minutes and reduced unnecessary transfusions by 40%.
- Led end-to-end UX for Workforce Optimization, a 0-to-1 predictive lab staffing platform, from customer discovery with lab managers through IA and interactive prototypes to pilot launch, achieving 17% labor cost reduction and measurable efficiency gains across enterprise partners within 6 months.

End to End Design & Analytics

- Redesigned a high-density clinical configuration platform through 8 stakeholder interviews and 6 usability tests, restructuring IA around clinical mental models to cut configuration time by 60% and tripled active users.
- Designed Data Control Center, unifying 2 legacy tools into a guided self-serve data platform through a build-vs-buy evaluation, reducing customer activation time by 48% and enabling 2x faster data onboarding.
- Navigated complex stakeholder requirements with a Fortune 500 diagnostic company, balancing dense clinical data needs with usability constraints to secure 100% client retention.

Design Systems and Standards

- Led audit and successful migration of legacy products to company's first design system, combining Shadcn foundations with custom components and company's visual language, improving team velocity by 25% and shortening release cycles significantly.
- Created a comprehensive style guide for the Analytics Platform built in Looker, unifying 10+ data-heavy dashboards under a consistent visual language.

Indiana University, Indianapolis – *UX Research Assistant (Part-time)*

Sep 2021 - May 2023

- Led NSF-funded mixed-method user research under Dr. Erin Brady, designing and executing studies with 20+ disabled professionals to identify systemic workplace accessibility barriers and develop evidence-based inclusive design frameworks.
- Synthesized findings across cognitive, physical, and social accessibility dimensions into actionable design recommendations, presenting to academic and industry stakeholders to inform accessible enterprise product standards.

GraffersID, Remote – *UX Designer*

Jun 2020 - Jun 2021

- Delivered end-to-end UX/UI across 15+ enterprise and startup client engagements in agile environments, making scope and trade-off decisions that cut project timelines by 25% and saving 4 weeks of development overhead per engagement.
- Redesigned the company website conversion architecture through user flow analysis and competitive research, increasing engagement by 35% and client conversions by 18%, while managing and mentoring designers across simultaneous client projects.

Skills

- Design:** Interaction Design, Visual Design, Information Architecture, High-Fidelity Prototyping, Design Systems, Component Architecture, Design Tokens, Storybook, Accessibility (WCAG)
- Strategy & Research:** Product Strategy, UX Strategy, Product Roadmapping, Design Leadership, Customer Discovery, Usability Testing, Heuristic Evaluation, Stakeholder Management, Agile
- Code:** HTML, CSS, JavaScript, React, TailwindCSS, SQL, GitHub, VSCode
- AI:** AI/ML Interaction Patterns, LLM-Powered Interfaces, Agentic UX, Vibe Coding, Prototyping with AI
- Tools:** Figma, FigJam, Antigravity, Google Stitch, Claude Code, Cursor, Figma Make, Bolt, Lovable, Miro, Jira, Notion, Confluence, Looker, Tableau

Leadership

- Pioneered hc1IQ's AI-assisted vibe coding workflow using Bolt, Claude, Claude Code, and Cursor, demonstrating how design intent could be translated directly into production-ready React components, cutting design-to-development time by 50% across the product team.
- Led cross-functional alignment across design, engineering, and product to establish AI design patterns and best practices adopted across the organization.
- Led a hands-on product design workshop at Stevens Institute of Technology, guiding students through end-to-end product development – user research, design systems, and product analytics.
